

Expertise & Innovation for a more Sustainable Future

SELECT THE RIGHT PARTNER FOR YOUR BUSINESS

CLEANTECH & GREEN BUILDING INTEGRATED SUPPLY CHAIN PROJECT

www.cleantech.centroestero.org

A manufacturing region with a green identity

Piemonte is one of the main manufacturing engines of Europe, with a strong industrial vocation and a fertile ground for continuous innovation and growth. In the last decades Piemonte has diversified its economic structure moving towards strategic sectors such as sustainable mobility, energy and clean technologies, green building, green chemistry and advanced materials. Piemonte has strongly invested in the development of a sustainable future, along with the goals of UN Agenda 2030 and the EU Policy "20-20-20".

Important financial resources have been allocated to support and encourage the growth of renewable energies, energy efficiency, and circular economy, with the aim of meeting economic and social targets while maintaining a healthy system for citizens.

Cleantech and green building companies in Piemonte are very active, dynamic and internationally oriented. The eco-industry has become one of the key sectors for the future of Piemonte where the major industrial competences belong to the following fields:

ENVIRONMENT:

- waste: collection, transport and disposal, sludge and industrial waste management and treatment, recycling and secondary raw material generation, waste-to-energy technologies and solutions, biogas production and upgrade to biomethane
- water. water management and distribution, wastewater, sludge and water treatment equipment, water metering, microbiotechnological products for bioremediation and water purification, reverse osmosis

ENERGY: energy production and management, energy efficiency and storage, equipment, components and technologies for traditional and renewable energy management & saving (gas, hydrogen, oil&gas, solar, photovoltaic, wind), consulting, design and construction of energy plants, PV, HPP and district heating plants, technologies, services and products for smart cities

GREEN AND SMART BUILDING: design, construction and management of eco-friendly buildings; equipment, technologies, finishes, furnishings and fittings, plant engineering and services, energy efficiency for buildings, technologies and solutions for sustainable and smart city. These competences are offered for civil, industrial, education, healthcare, storage/warehouse/logistics, hospitality, data center and commercial buildings

GREEN CHEMISTRY: bio-based products, production of energy and heat from biomasses, byproducts and scraps for the production of biofuels, energy and heat.

Piemonte companies work in all the steps of the supply chain, providing engineering and consulting services, equipment, machineries and components, turnkey construction, plants and civil works.

In Piemonte the cleantech and green building sectors count over 6,000 companies, 1,300 operating in the environment field, 1,000 in the energy field, 3,700 in the green building field.

Cleantech & Green Building is the Integrated Supply Chain Project promoted by Regione Piemonte (Regional Government), co-funded by the European Regional Development Fund 2021-2027 and carried out by Piemonte Agency providing international players with a preferential channel to meet and start business with top class cleantech and green building enterprises based in Piemonte, Italy. The team makes an assessment of buyers' needs and technicians' requirements from all over the world and provides them with:

- top class skills and unique manufacturing know-how
- capable suppliers that can deliver on time high-quality products and solutions at competitive prices
- technologically qualified and competitive supply chains sharing commercial objectives, target clients and strategies
- technical working groups where local enterprises and foreign companies work together to develop projects aligned to the expectations of their international players.

The project Team's assistance is supply chain focused and completely **free of charge** for international players. It ascertains their outsourcing needs and arranges b2b meetings according to their technical requirements with the most suitable partners - in Piemonte or on their premises -, visits to local companies to discover the region's cleantech sector, participation to international events and trade missions to connect demand and supply. Thanks to new technologies and platforms virtual meetings can also be arranged

For more information on the Cleantech & Green Building sector in Piemonte and the business opportunities, contact the Project Team:
